

Disease Modelling Workshop

Pomewest and Stonefruit WA invites you to a workshop on pome and stone fruit disease management.

Guest Presenters:

Marcel Veens, Horticultural Advisor, QLD

Andrew Taylor, Plant Pathologist DPIRD Bunbury

- Workshops will be presented on how to best manage the impact of black spot and powdery mildew in apples, pear scab and brown rot for stone fruit.
- The aim is to improve the local knowledge and understanding of these diseases and enable better preventative and control measures using the disease modelling support system RIMpro.
